The Toowoomba Family Relationship Centre (FRC) supports families to focus on their children's needs during and/or after separation. The FRC assists separated parents and families to negotiate and agree on workable parenting arrangements outside of the court system.

The FRC supports families by connecting them to information and referrals, conflict and communication programs as well as facilitating Family Dispute Resolution (FDR). Where appropriate, Child Inclusive Family Dispute Resolution (CIFDR) is also considered, which enables the voices of the children to be heard through the FDR process.

Our FDR service assists families to understand their children's needs following separation and to develop age appropriate Parenting Plans to support their child/ren to reach their full potential.

The FRC also provides FDR services relating to Property Settlement (if eligibility criteria is met) so that separated partners can negotiate and agree on financial matters without litigation.

Our team respects cultural differences and beliefs, and works supportively with diverse relationships and family arrangements to provide positive outcomes for children and families.
